

BALANCE4kids

Join us for an informative presentation by
Dr. Heidi Morgan , BCBA-D (Board Certified Behavior Analyst)

Contingent vs. Non-contingent Reinforcers

In the field of behavior analysis, we are working with numerous layers of interventions – along with numerous interventionists. With careful communication, as well as program development, a “nest” of reinforcer programs can/should be made available in order to avoid “all or nothing” behavior on the part of the student/consumer/client. Join us for a rich discussion on “contingent” (earned or dependent on _____) vs. “non-contingent” (unearned) reinforcers. This will be of particular interest to participants interested in quality of life topics.

Bio: Dr. Heidi Morgan is board certified as a behavior analyst (BCBA-D) by the Behavior Analyst Certification Board and credentialed School Psychologist. She has worked in the field of developmental disabilities since 1993 in numerous certified residential and school-based positions. Dr. Morgan consults with Level 41 facilities throughout the San Andreas Regional Center catchment area and is licensee of three Level 41 facilities in Santa Cruz County. She has a host of special interests, one of which includes photographing persons with developmental disabilities and their caregivers.
